	0.50	35.57	19.76	15.81		0.50	53.35	29.64	23.71
0.60	42.68	23.71	18.97	0.60	64.02	35.57	28.45		
0.70	49.80	27.66	22.14	0.70	74.69	41.50	33.19		
0.80	56.91	31.62	25.29	0.80	85.36	47.42	37.94		
0.90	64.02	35.57	28.45	0.90	96.03	53.35	42.68		
1.00	71.14	39.52	31.62	1.00	106.70	59.28	47.42		
1.10	78.25	43.47	34.78	1.10	117.37	65.21	52.16		
1.20	85.36	47.42	37.94	1.20	128.04	71.14	56.90		
1.30	92.48	51.38	41.10	1.30	138.72	77.06	61.66		
1.40	99.59	55.33	44.26	1.40	149.39	82.99	66.40		
1.50	106.70	59.28	47.42	1.50	160.06	88.92	71.14		

Note: Use this table to compute annual costs/savings for other numbers of weekly showers by:  
 1. locating your shower time and water rate\*  
 2. multiplying the corresponding costs/savings figures by your weekly showers.  
 3. Dividing by 10

\*Contact your municipality for your true water rate that includes sewage charges and/or surcharge.  
 Note the additional savings by reducing the showering time regardless of showerhead type.

Most showerheads consume 2.5 USgpm/9.85L so for the average shower of 10 minutes, that's 25 gallons or 98.5L of water going down the drain (and that's 12.5 gallons or 49.25L more than you should be using & paying for)

Currently the 1st & only 1.25 imp.gpm/5.7L showerhead on the market with a patented Turbine Water-Saving Technology will be available to all City residents. While using less water, the unique turbine technology creates an equivalent experience to those higher flow-rated showerheads!

As these showerheads are not yet available in retail stores, the City of Woodstock has partnered with a manufacturer and a local supplier to offer a premium reduced rate for this "Special Buy", available from June 1, 2008 for a limited time, at the City Engineer's Office.

3-Function Showerhead with 1.7gpm spray

3-Function Showerhead with 1.25gpm turbine spray

Make Every Drop Count!
